The Human Resources and Corporate Affairs Director

Castel Malawi Limited
P.O. Box 406
Blantyre, Malawi

Re: Application for Fullstack Software Developer Position

Dear Hiring Manager,

I am excited to apply for the **Fullstack Software Developer** position at **Castel Malawi Limited**. With a **Bachelor of Science in Physics** from the University of Malawi and a **Software Engineering Certification from ALX Africa**, I bring a unique blend of analytical problem-solving skills and fullstack development expertise that align perfectly with the role's requirements.

As a **Software Developer at Business On Software (BOSS)**, I have honed my skills in **backend engineering, frontend development, DevOps, and database security**. My responsibilities included maintaining and enhancing existing software, developing stable new systems, and implementing security measures to protect hosted applications. Additionally, my work as a **Part-time Physics Lecturer at the University of Malawi** has strengthened my ability to break down complex concepts and work collaboratively in a structured environment.

Beyond my technical expertise, I am passionate about **developing scalable and efficient software solutions** that improve user experiences. My proficiency in **Laravel, Node.js, React, Python, and DevOps tools like Docker and Jenkins** makes me a strong candidate for driving innovation in in-house application development at Castel Malawi Limited.

I am eager to bring my problem-solving mindset and technical expertise to your team. I would welcome the opportunity to discuss how my skills can contribute to Castel Malawi's success. If you need more reference for my work and skill you can check my portfolio at <https://bryanport.netlify.app>. Thank you for your time and consideration.

Best regards,

Brian Ndabaningi Saiti Mtonga
